

Progress Board — User Guide

v2.5.1 · Claude desktop app (Code tab) and `claude` in the terminal.

A small panel that always sits **above the prompt box**. It shows what Claude is working on, how much usage you have left, and what went wrong. It turns on automatically in every session.

Reading a row: the **dot** on the left shows the status (green = plenty left, yellow = about half, orange/red = running low). The **label** shows details such as "864k of 1.0M left" or "resets in 4h 2m". The **bar** on the right fills with what has been used, and the badge shows % left.

What's on the board

Row	What it tells you
Task bars	Multi-step work split into stages and steps: done steps are filled, the active one glows, and errors are marked. A bar shows <i>waiting for you</i> when Claude needs a decision. Finished bars fold away after about 1 minute.
Tasks	Claude's own to-do list, ticked off as it goes.
Agents	One line per helper agent running in parallel. Finished agents fold into "+N more".
Git	Project · branch · lines added (+) and removed (–). Shown only inside a version-controlled project.
Context window	How much of Claude's memory for this chat is used. At 85% or more , a Compact button appears: click it to summarise the chat and free up space.
5-hour / Weekly limit	Your account's usage allowance, with a countdown to the reset.
This chat	Usage figures for the current conversation (see below).
Error button	Appears when an action failed this turn. Click it to see which action failed and why.

Pace icons on the limit rows:

Icon	Meaning
 relaxed	Slower than the clock, so plenty to spare
 on pace	Using it at about the expected rate
 burning fast	Faster than the clock. If it says <i>"runs out in ..."</i> , you will hit the limit before it resets

Sounds play when Claude needs your decision, when something fails, and when work is done.

"This chat" row

A **token** is the unit Claude reads and writes, roughly one syllable or word piece. **k** means thousand and **M** means million.

Chip	Example	Meaning
↑ orange	32.1k	New input: your messages, file contents, and results of actions Claude ran
↓ green	13.6k	Output: what Claude wrote, such as replies, files, and commands
Stack, blue	2.58M	Re-read from cache. Each turn, Claude re-reads the whole chat. Earlier parts come from the cache at about 1/10 of the cost. This number is always the largest and grows as the chat gets longer. That is normal.
\$ yellow	\$3.18	Estimated cost at API prices. On a Claude subscription you are not charged this . The 5-hour and weekly limits are what actually get used up.

Optional chips appear when data is available: ⌚ total working time · 🕒 current or last task time · ⌚ how long the cache stays warm (**cold** = expired) · ⚡ writing speed · ⚙ last tool used · \$ skills in use.

Commands

Command	Action
/progress	Show or hide the whole board (same as the Progress button below the prompt)
/progress-usage	Show or hide the context, limit, and "This chat" rows
/progress-demo	Show a sample task bar
/progress-clear	Remove all task bars
/progress-errors	List this turn's failed actions and the reasons
/progress-sounds	Play the three sounds

Tips

- **Context almost full?** Click **Compact** before starting a big new task.
- **Cache chip in the millions?** Start a **new session** for a new topic. It is much cheaper than continuing a long chat.
- 🔥 **"runs out in 46m" but the reset is hours away?** Postpone heavy work.
- ⌚ **still warm?** Replying now is faster and cheaper.

Troubleshooting

Problem	Fix
No board	Type <code>/progress</code> (it may be hidden). If it still does not show, quit Claude with <code>⌘Q</code> and reopen it.
Two boards	Ask Claude to disable the duplicate board.
No sound	Run <code>/progress-sounds</code> , then check the Mac volume and Do Not Disturb.
No limit rows	They appear after Claude's first reply. With an API key, the amount spent is shown instead.

Update or remove

- **Update:** run `git pull` , run the installer again, then restart Claude.
- **Remove:** ask Claude to remove Progress Board. Settings are backed up before every change.
